Granite spheres in sizes 10" to 24"

Disappearing Fountains

What a great way to make a really beautiful addition to your landscape! You choose the statue, ceramic vase or the stone fountain and build your own water feature. Put your disappearing fountain where you can see it from your home or patio. Sun or shade doesn't matter like it does for a water garden. A disappearing fountain can be placed anywhere you want the look and sound of flowing water.

Features —

- "Child safe" — No Exposed Water to Fall Into
- Easy Maintenance — Just add water and Fountec
- Huge selection of Pots and Stones for Fountains.
- Stay outside year round.

**All these items
are available
for pickup or
shipment.**

Steps to a Disappearing Fountain

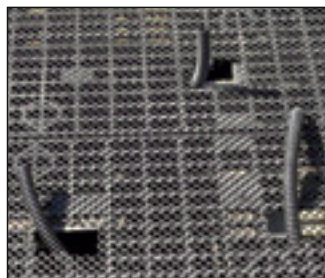

1. Select a Fountain Piece. (Pottery, Stone, etc.)
2. Select a Basin Assembly Size. Keep in mind bigger is better. There is less water loss to wind and longer times between adding water.
3. Select a Pump. We recommend pump sizes at purchase based on the Fountain Piece and look desired.
4. Select Rock to cover basin.
5. Assemble and Install the Fountain.
 - A. Dig a level hole about 10" deep.
 - B. Add Basin, level and backfill hole with soil.

C. Add Cinder block and pump assembly.

D. Cut holes in grating and mesh for fountain tubing and pump access.

E. Install grating then mesh.

F. Place fountain piece(s).
G. Add optional Lighting.
H. Add water and adjust fountain flow.
I. Add pebbles.
J. ENJOY!!!
